

Fly Tying

Welcome to our newest Fly Tying materials catalog!

Flymen Fishing Company focuses on designing innovative, best-of-breed fly tying products and next generation flies for the weighted fly market.

We have recently expanded the award-winning **Fish-Skull™** brand by adding three exciting, new fly tying products for streamers. These materials include the Fish-Skull™ Sculpin Helmet, Fish-Skull™ Articulated Shank and a full range of Fish-Skull™ Frantic Tails in different sizes.

The reputation of our popular **Nymph-Head™** brand of tungsten and brass fly tying beads continues to grow amongst anglers. We have recently added more sizes, new anodized colors and created compelling new packaging for the retail environment.

Our Dealers

The majority of our products are sold throughout the world via a growing dealer network of distributors, fly shops and outdoor retailers. We encourage you to contact us or visit our website to find a fly shop in your area who stocks our products. If you are a fly fishing and fly tying retailer wishing to stock our products, we provide information on how you can easily join our well established dealer program.

Thank you for your interest and enthusiasm for our company and products.

Happy tying and fishing!

Martin Bawden

Nymph-Head™

Nymph-Head™ Heavy Metal tungsten beads

Nymph-Head™ FlyColor brass beads

Fish-Skull™

Fish-Skull™ Baitfish Head

Fish-Skull™ Sculpin Helmet

Fish-Skull™ Articulated Shank

Fish-Skull™ Frantic Tails

The popular Nymph-Head™ brand includes the two leading ranges of fly tying beads on the market.

- 2 ranges of fly tying beads in tungsten and brass.
- 10 traditional, attractor and natural fly colors.
- 6 bead sizes to fit hook sizes from #4 to #20.

Nymph-Head Heavy Metal™ tungsten beads

These modern tungsten fly-tying beads not only enhance and breathe new life into existing nymph patterns, but also offer fly tiers endless possibilities for creating exciting, new flies.

- **3D Nymph Eyes** - give your flies a more realistic profile.
- **15% more tungsten** - heavier than normal round beads for you to tie the fastest sinking flies on the planet!
- **10 vibrant colors** in a superior anodized finish.
- **In your fly box** – now you can easily tell which flies have tungsten beads.

BAITFISH HEAD

The Fish-Skull™ is a weighted head with a realistic baitfish profile that is specifically designed for tying freshwater and saltwater streamer fly patterns.

Quick-and-easy to tie, this latest fly tying innovation offers an exciting alternative to using old-style dumbbells, cones or lead wraps to weight your flies. The Fish-Skull™ has unique design features making it a versatile platform for tying a wide variety of realistic, weighted streamer patterns using natural and synthetic fly tying materials.

Realistic Baitfish Profile

- Mimics the head and gill plates of a baitfish.
- Typically “pushes more water” than traditional flies.

Innovative “Front Fitting” design

- Quick-and-Easy to tie.
- No need to use epoxy to build up a head.

Realistic 3D Eyes

- An important “trigger” for predatory game fish.
- 3D Eyes are included eliminating additional cost.

Top and Bottom Slots

- Allows vertical freedom of movement for the tying materials and enables broader profile flies to be tied.

Weight and finish

- Made from a lightweight metal composite, the Fish-Skull™ has a realistic size head with a large surface area, but does not add excessive weight.
- 100% Lead Free.
- Corrosion resistant in saltwater.

Built-in Keel

- Unique design feature places the center of gravity and 70% of the weight below the hook shank producing a “keeling” effect similar to a dumbbell.
- The Keel helps your fly track and orientate itself in the correct position.
- Enables the fly to be tied in the “hook up” position if desired.

HEAD SIZE	*HOOK SIZE RANGE	# HEADS IN PACK	3D FISH EYES INCLUDED
SMALL	#8, #6, #4	10	YES

LARGE	#2/0, #3/0, #4/0	6	YES

RETAIL READY PACKAGING (RRP)

SCULPIN HELMET™

The Sculpin Helmet is an exciting, new style of Fish-Skull™ with a realistic, flat and broad profile that imitates common bottom-dwelling fish species such as sculpins, gobies and baby catfish.

Designed for use on both hook and tube flies allowing anglers to easily tie weighted streamers that fish deep and imitate these popular food sources.

Key Features:

- Realistic flat and broad profile.
- Innovative front fitting design makes it quick and easy to tie.
- The weighted keel (bottom) lets you tie flies that swim in the hook-up position.
- New style of front slot designed for hooks and tube flies.
- Brown and Olive natural colors.
- Small and Large sizes.
- For streamers in the #6 up to 2/0 hook size range.

SKULL SIZE	HOOK SIZE RANGE	COLORS	# SKULLS IN PACK	3D SCULPIN EYES INCLUDED	HOOKS AND TUBES
SMALL	#6, #4, #2, #1	OLIVE & BROWN	8	YES	YES
LARGE	#2, #1, 1/0, 2/0	OLIVE & BROWN	8	YES	YES

ARTICULATED SHANK™

The Articulated Shank™ is an innovative, new fly tying material designed to simplify the tying of articulated flies. It can be used as a simple component in different styles of articulated flies such as single-hook and two-hook articulated streamers and poppers. It is also used for streamers that use a free-swinging stinger hook such as Intruder-style salmon and steelhead flies.

- Easy-and-fast tying process.
- Increases tail action.
- Increases the overall fly length.
- Reduces the leverage a hooked fish places on a fly.
- Eliminates the need to “sacrifice a hook” to make a shank.

Single-hook streamers

Free-swinging stinger hook streamers

- 3 shank lengths.
- For flies 3” (7.5cm) and longer.
- Typically for hook sizes starting from sizes #4 up to 3/0.
- Fits the Fish-Skull™ Baitfish and Sculpin Helmets.
- High strength stainless steel for use in saltwater.

20mm	20	STAINLESS SPRING STEEL WIRE
35mm	20	
55mm	20	

Articulated Poppers

FRANTIC TAILS™

Fish-Skull™ Frantic Tails are ultra-lightweight, bite-proof, synthetic fish-tails that can be used for almost any style of baitfish fly pattern or surface popper.

Frantic Tails™ have a realistic baitfish profile offering fly fishermen a simple and effective alternative to using hackle and other traditional tail materials. They are made of an almost indestructible synthetic suede that cannot be bitten off, will not shrink and is easily colored with a permanent marker pen. Most importantly, they produce a frisky, fish-attracting tail action when fished!

They are easy to tie with an innovative attaching method designed to give the fly maximum tail movement and help prevent fouling when casting.

Now available in a full range of sizes and colors, the **newly expanded** range of Frantic Tails™ can be combined with different natural and synthetic body materials to create a wide variety of flies.
